Sumitomo Electric Industries, Ltd.

Sumitomo Electric Exhibits at ITS World Congress 2019

Sumitomo Electric Industries, Ltd. will showcase its products at ITS World Congress 2019, to be held in Singapore from October 21 to 25, 2019.

The ITS World Congress is a world conference that exchanges information on ITS (Intelligent Transport Systems) technologies and policies, and seeks to solve traffic problems and create business opportunities through the spread of ITS.

With a focus on a connected society, Sumitomo Electric will present mobility solutions such as a next-generation traffic management system and a pedestrian detector. We will hold a session about traffic management using open big data and analysis technologies (from 14:00 to 15:30 in October 24, Session No. AP09).

We are looking forward to seeing you at our booth.
