

Hyperscale eXchange (HSX)

Description:

Sumitomo Electric Lightwave's newest product to the Ultra High Fiber Count Connectivity Solution is the HSX. The new Hyper Scale eXchange is ideal for ultra high density network designs. With a capacity of 10,368 fibers, the new eXchange facilitates easy cable installation with removable doors, panels, and splice trays. Cable congestion is no longer an issue due to cable entries on both sides of the unit.

For more information about SEL's new Hyper Scale eXchange, or other products related to the ultra high fiber count connectivity solution, please visit www.SumitomoElectric.com.

Ordering Information

Part Number	Description
